

At The Teddy Bears Inn Day Nursery, we aim to protect children at all times. We recognise that accidents or incidents may sometimes occur. We follow this policy and procedure to ensure all parties are supported and cared for when accidents or incidents happen; and that the circumstances of the accident or incident are reviewed with a view to minimising any future risks.

Accidents

Location of accident files: Foyer

- The person responsible for reporting accidents, incidents or near misses is the member of staff who saw the incident or was first to find the child where there are no witnesses. They must record it on an Accident Form and report it to the nursery manager. Other staff who have witnessed the accident may also countersign the form and, in more serious cases, provide a statement. This should be done as soon as the accident is dealt with, whilst the details are still clearly remembered. Parents must be shown the Accident Report, informed of any first aid treatment given and asked to sign it as soon as they collect their child
- The nursery manager reviews the accident forms termly for patterns, e.g. one child having a repeated number of accidents, a particular area in the nursery or a particular time of the day when most accidents happen. Any patterns will be investigated by the nursery manager and all necessary steps to reduce risks are put in place
- The nursery manager will report serious accidents to the registered person for investigation for further action to be taken (i.e. a full risk assessment or report under Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR))
- The Accident File will be kept for at least 21 years and three months
- Where medical attention is required, a senior member of staff will notify the parent(s) as soon as possible whilst caring for the child appropriately
- Where medical treatment is required the nursery manager will follow the insurance company procedures, which may involve informing them in writing of the accident
- The registered provider will report any accidents of a serious nature to Ofsted and the local authority children's social care team (as the local child protection agency), where necessary. Where relevant such accidents will also be reported to the local authority environmental health department or the Health and Safety Executive and their advice followed.

Transporting children to hospital procedure

The nursery manager/staff member must:

- Call for an ambulance immediately if the injury is severe. DO NOT attempt to transport the sick child in your own vehicle
- Whilst waiting for the ambulance, contact the parent(s) and arrange to meet them at the hospital
- Arrange for the most appropriate member of staff to accompany the child taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter.
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Inform a member of the management team immediately
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident.

First aid

The first aid boxes are located in: The main foyer/Toddler and Pre-school bathroom

These are accessible at all times with appropriate content for use with children.

The appointed person responsible for first aid checks the contents of the boxes regularly and replaces items that have been used or are out of date.

The staff first aid box is kept in the nursery foyer. This is kept out of reach of the children.

First aid boxes should only contain items permitted by the Health and Safety (First Aid) Regulations Act 1981, such as sterile dressings, bandages and eye pads. No other medical items, such as paracetamol should be kept in them.

The appointed person(s) responsible for first aid is Michelle Williams

Most of the staff are trained in paediatric first aid and this training is updated every three years.

All first aid trained staff are listed in every room. When children are taken on an outing away from our nursery, we will always ensure they are accompanied by at least one member of staff who is trained in first aid. A first aid box is taken on all outings.

Personal protective equipment (PPE)

The nursery provides staff with PPE according to the need of the task or activity. Staff must wear PPE to protect themselves and the children during tasks that involve contact with bodily fluids. PPE is also provided for domestic tasks. Staff are consulted when choosing PPE to ensure all allergies and individual needs are supported and this is evaluated on an ongoing basis.

Dealing with blood

We may not be aware that any child attending the nursery has a condition that may be transmitted via blood. Any staff member dealing with blood must:

- Always take precautions when cleaning wounds as some conditions such as hepatitis or the HIV virus can be transmitted via blood.
- Wear disposable gloves and wipe up any blood spillage with disposable cloths, neat sterilising fluid or freshly diluted bleach (one part diluted with 10 parts water). Such solutions must be carefully disposed of immediately after use.

Needle punctures and sharps injury

We recognise that injuries from needles, broken glass and so on may result in blood-borne infections and that staff must take great care in the collection and disposal of this type of material. For the safety and well-being of the employees, any staff member dealing with needles, broken glass etc. must treat them as contaminated waste. If a needle is found the local authority must be contacted to deal with its disposal.

At The Teddy Bears Inn Day Nursery we treat our responsibilities and obligations in respect of health and safety as a priority and we provide ongoing training to all members of staff which reflects best practice and is in line with current health and safety legislation.

Sickness and Illness

At The Teddy Bears Inn Day Nursery, we promote the good health of all children attending. To help keep children healthy and minimise infection, we do not expect children to attend nursery if they are unwell. If a child is unwell it is in their best interest to be in a home environment with adults, they know well rather than at nursery with their peers.

Our procedures

In order to take appropriate action of children who become ill and to minimise the spread of infection we implement the following procedures:

- If a child becomes ill during the nursery day, we contact their parent(s) and ask them to pick up their child as soon as possible. During this time, we care for the child in a quiet, calm area with their key person, wherever possible

- We follow the guidance given to us by Public Health England (formerly the Health Protection Agency) in Guidance on Infection Control in Schools and other Child Care Settings and advice from our local health protection unit on exclusion times for specific illnesses, e.g. sickness and diarrhoea, measles and chicken pox, to protect other children in the nursery.
- Should a child have an infectious disease, such as sickness and diarrhoea, they must not return to nursery until they have been clear for at least 48 hours. We notify Ofsted as soon as possible and in all cases within 14 days of the incident where we have any child or staff member with food poisoning. We inform all parents if there is a contagious infection identified in the nursery, to enable them to spot the early signs of this illness. We thoroughly clean and sterilise all equipment and resources that may have come into contact with a contagious child to reduce the spread of infection
- We exclude all children on antibiotics for the first 48 hours of the course (unless this is part of an ongoing care plan to treat individual medical conditions e.g. asthma and the child is not unwell) This is because it is important that children are not subjected to the rigours of the nursery day, which requires socialising with other children and being part of a group setting, when they have first become ill and require a course of antibiotics
- We have the right to refuse admission to a child who is unwell. This decision will be taken by the manager on duty and is non-negotiable
- We make information/posters about head lice readily available and all parents are requested to regularly check their children's hair. If a parent finds that their child has head lice we would be grateful if they could inform the nursery so that other parents can be alerted to check their child's hair.

Meningitis procedure

If a parent informs the nursery that their child has meningitis, the nursery manager will contact the Infection Control (IC) Nurse for their area. The IC Nurse will give guidance and support in each individual case. If parents do not inform the nursery, we will be contacted directly by the IC Nurse and the appropriate support will be given. We will follow all guidance given and notify any of the appropriate authorities including Ofsted if necessary.

Transporting children to hospital procedure

The nursery manager/staff member must:

- Call for an ambulance immediately if the sickness is severe. DO NOT attempt to transport the sick child in your own vehicle
- Whilst waiting for the ambulance, contact the parent(s) and arrange to meet them at the hospital
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Arrange for the most appropriate member of staff to accompany the child taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter
- Inform a member of the management team immediately

- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident
